Dear partners!

The Ukrainian LPG Association (ULPGA), which reflects the combined interests of national LPG operators of Ukraine, considers it necessary to inform you about the current provisions of Ukrainian legislation on rail transport.

The military aggression of the Russian Federation made it impossible to continue using most of the working logistics routes used by Ukraine and its trading partners. As a result, the volume of goods transported by rail on the western border of Ukraine has increased, which requires a significant increase in rolling stock on the 1435 millimeters standard railway track.

Due to the war on the territory of Ukraine, lack of rolling stock and serious fears of owners and operators (1435mm cars) of rolling stock, the Cabinet of Ministers of Ukraine adopted the Resolution to ensure the safety of shipping and rail transport (<https://www.kmu.gov.ua/en/news/mininfrastrukturi-zahodi-uryadu-iz-zabezpechennya-logistichnih-marshrutiv>). The Resolution provides for the allocation of funds from the reserve fund of the state budget to compensate for damage if insurance companies refuse to provide insurance coverage.

These measures provide additional safety guarantees for owners and operators of railway cars. Therefore, we ask you to consider state guarantees in subsequent applications from Ukrainian companies for the use of railway rolling stock.

The Ukrainian LPG Association (ULPGA) will provide additional information and comprehensive assistance in communications with relevant ministries and institutions to ensure guarantees and traffic safety in Ukraine to owners and operators of cars (1435 mm standard).
